Copyright

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. Photographic reproduction, microform, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade names, trade marks, etc. in this publication, even if the former are not specifically identified, is not to be interpreted as a sign that such names are exempt from the relevant protective laws and regulations and may accordingly be used freely by anyone.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors nor the editors nor the publisher can accept legal responsibility for errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for the USA

The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the USA copies may be made for personal or internal use, provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

If a code does not appear copies of the article may be made without charge, provided permission is obtained from the publisher.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Authors of this Journal can benefit from library and photocopy feeds collected by VG Wort if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft Wort, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

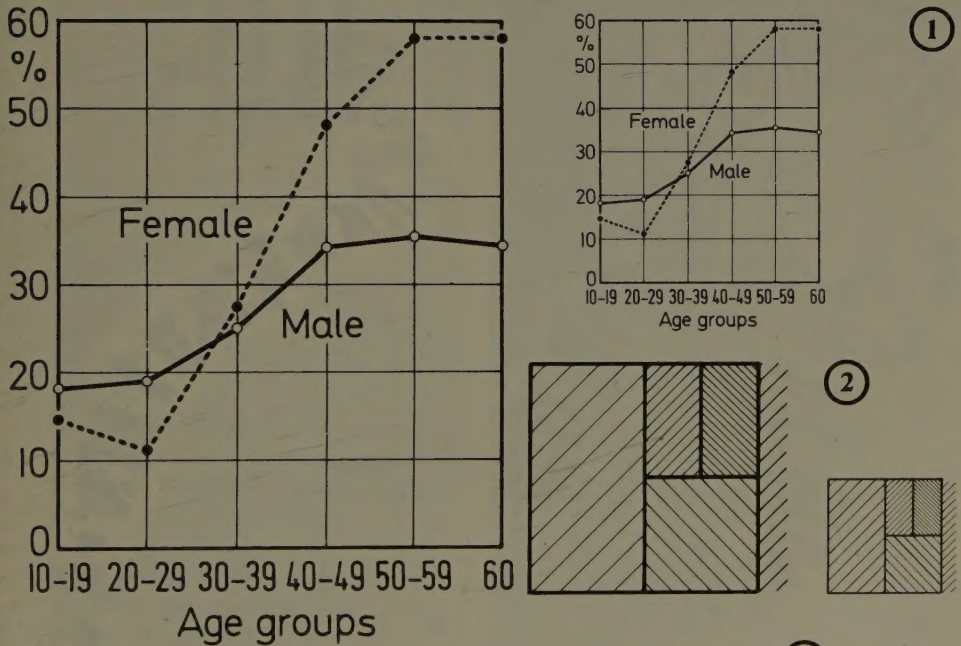
Advice to Authors

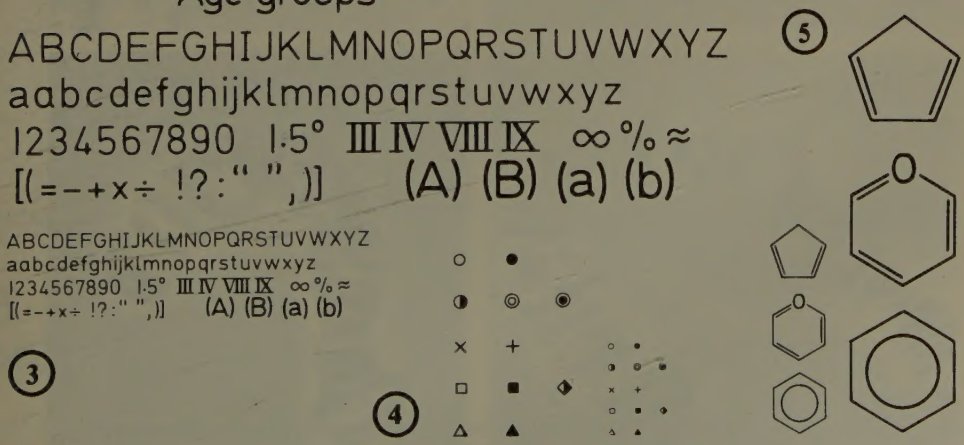
The illustrations that will appear in your contribution will be shown to best advantage if you follow the brief set of instructions below. Please read carefully. Thank you. The Publisher

Preparation of Line Drawings

Illustration copy should be prepared to fit the format of the column or printed page (print area) so that 1 : 1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired.
The publisher reserves the right to reduce or enlarge illustrations.
Drawings are to be twice the final size and executed in indelible black ink.

Important points to note: thickness of lines, size of inscriptions, size of measuring points, adequate spacing of shaded and dotted areas.
Words should be in upper- and lower-case characters, not capitals.
The following are optimal sizes as they finally appear in the journal:
Capital letters and numbers: 2 mm
Lower-case letters: 1.6 mm.





Samples 1 to 5 show the original size and after 50 % reduction.

Selection of Illustration Material for Halftones

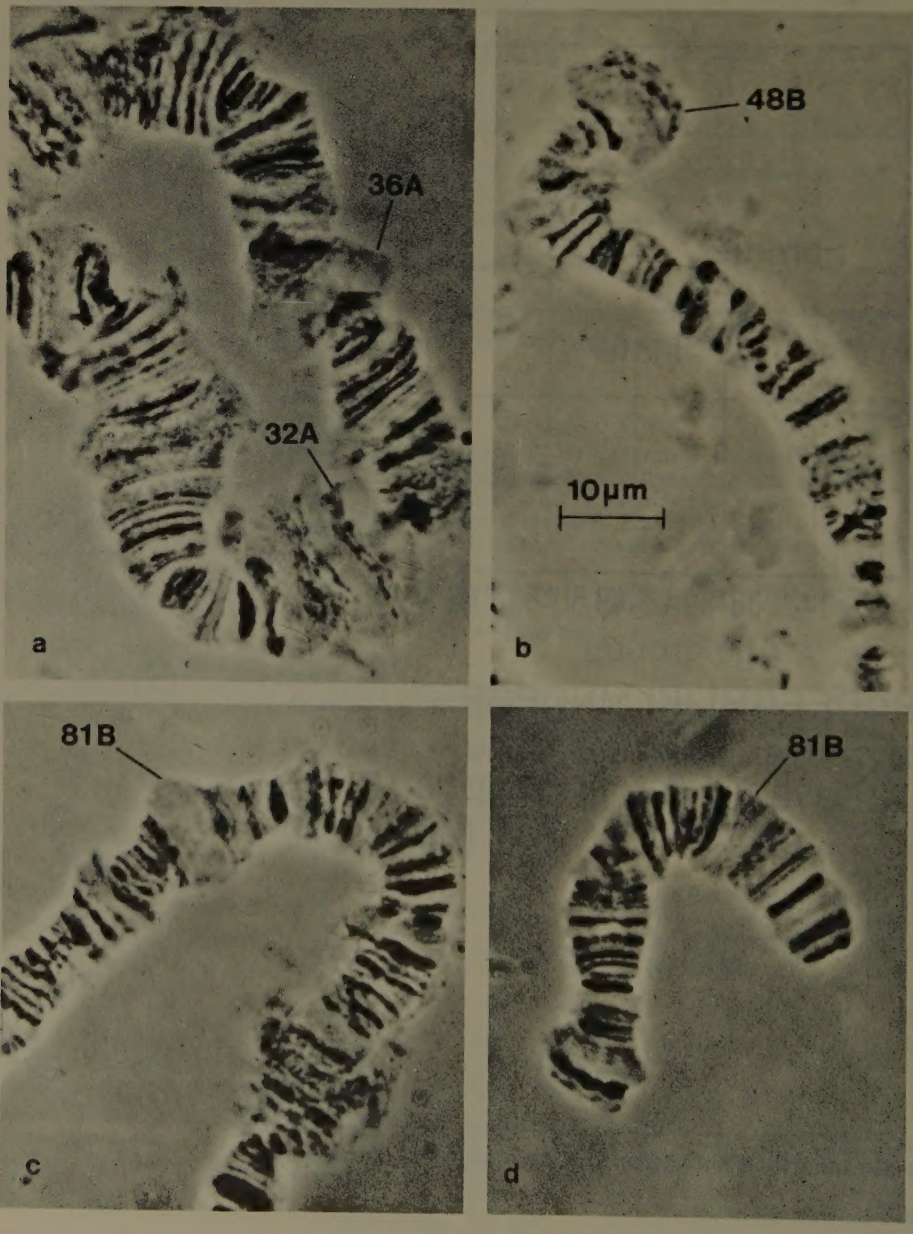
(photographs, micrographs, X-rays, instrument traces etc.).

Photographs should be sharp, well-contrasted glossy prints of the original negative, trimmed at right angles. Halftone illustrations should be prepared to fit the format of the printed page (print area) so that 1 : 1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

Mark or crop marginal portions which are not required (at right angles, please).

Please see that illustrations which are to appear together are mounted accordingly as plates and that they correspond in size.

Also they should not exceed the print area of the page, including room for the legend.

With X-rays, please indicate the significant parts on the back of the copy, or on an overlay.


Inscriptions, marks and scale lines should preferably be drawn neatly in black ink in an appropriate size on the face of the illustrations. Inscriptions should be about 3 mm high. Where Letraset is used, please handle it carefully and protect the photographs with an overlay.
